AI Dynamic Face Recognition Attendance With Door Access
TT-52AI

2 YEARS WARRANTY

TT-52AI is a software version of our latest facial recognition terminal that incorporates AI technology for faster, more accurate face recognition. With low light support and the ability to scan faces even when wearing masks, this device is ideal for small and medium-sized companies looking for a reliable and affordable attendance and door access solution. The software is designed for easy device control, and the terminal can be used for door access function.

Low Light Capture

RoHS CE FC

Flexible Face Recognition Distance
0.5~2.5 Meters

0.5m Close

1.5m Middle

2.5m Far

What is NPU

NPU stands for Neural Processing Unit, which is a specialized microprocessor designed for performing AI and deep learning tasks. It is typically integrated into devices such as smartphones, cameras, and other electronic devices that require high computing power to perform complex AI algorithms. An NPU is optimized for processing large amounts of data simultaneously, making it an efficient and effective solution for AI-related tasks.

SPECIFICATIONS
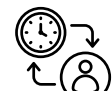

Door Access	5,000	5,000
500,000 Data	WiFi Build-in	Standalone
Comm USB	Face, Card, Password	Multiple Shift
Adaptor DC12V	Addon	4.3" Colour Screen
Build-in Bell	Working Humidity 28%~80%	Working Temperature 0°C~25°C

Authorized Reseller :
