Thank you

Water Proof!

A biometric device equipped with AI-powered dynamic facial recognition technology, enabling rapid identification and effective face detection even in low-light environments. It can accurately scan faces with masks on and offers a capacity of up to 5,000 facial records. With a recognition speed of less than one second, its robust NPU processor ensures quick and efficient operation, making it an ideal choice for businesses seeking a reliable and advanced biometric solution.

2 YEARS WARRANTY

Wear Glasses
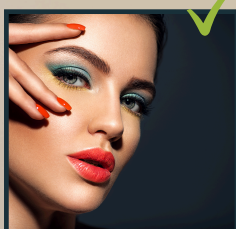

Makeup

Mustache

Wear Hijab

Wear Mask

LOW LIGHT

5 PEOPLE DETECTION

IP65 WATER PROOF

RoHS CE FC

![TIMETERA - solution for data]

Flexible Face Recognition Distance
0.5~2.5 Meters
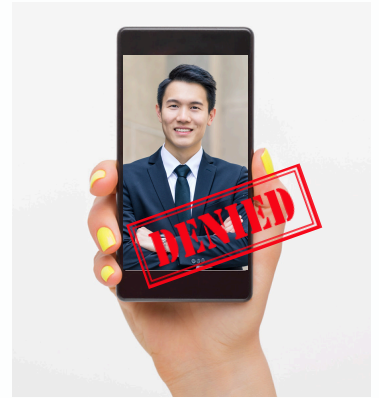

0.5m Close

1.5m Middle

2.5m Far

What is NPU

NPU stands for Neural Processing Unit, which is a specialized microprocessor designed for performing AI and deep learning tasks. It is typically integrated into devices such as smartphones, cameras, and other electronic devices that require high computing power to perform complex AI algorithms. An NPU is optimized for processing large amounts of data simultaneously, making it an efficient and effective solution for AI-related tasks.

SPECIFICATIONS
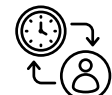

Door Access	5,000	5,000
500,000 Data	Build-in (WiFi)	Software
Comm USB, Wifi,TCP/Ip	Face, Card, Password	Multiple Shift
Adaptor DC12V	Addon	5" Colour Screen
Build-in Bell	Working Humidity 28%~80%	Working Temperature 0°C~25°C
